SUMMARY

Full-stack web developer who ships production software across Next.js front ends and Ruby on Rails back ends. Launched a live Shopify-backed e-commerce storefront, achieved 100% test coverage on REST APIs during a professional internship, and currently build a SaaS booking platform for a Canadian client. Comfortable owning features from requirements through testing to deployment.

EXPERIENCE

Ruby on Rails Cloud Developer Intern

January 2026 - April 2026

Tindahan Tapat (Nueca Technologies Inc.)

- Built an internal SMS dashboard integrating company systems with the M360 SMS provider for delivery and monitoring.
- Designed and implemented 2 RESTful API endpoints in Ruby on Rails for core SMS operations and external service integration.
- Wrote 300+ automated tests with RSpec, reaching 100% code coverage across all endpoints, including edge cases.
- Debugged and refactored backend services for maintainability, delivering across six-week Agile sprints.

Freelance Full-Stack Developer

February 2026 - Present

Self-employed

- Build client web applications front-to-back in Next.js/React, integrating with Shopify and Laravel back ends over REST APIs.
- Work directly with clients to gather requirements, iterate on features, and ship production-ready releases.

PROJECTS

Groovy — E-commerce Storefront

January 2026 - May 2026

Full-Stack Developer | groovyph.com

- Built and launched the live store for a Philippine streetwear brand: a Next.js storefront backed by Shopify, processing real orders end-to-end.
- Implemented the customer-facing web view and configured the Shopify side, wiring product, cart, and check-out flows through Shopify's APIs.

Stadiops — Sports Training Booking SaaS

April 2026 - Present

Frontend Developer

- Building the front end of a booking and scheduling platform for a Canadian client serving private-training sports teams.
- Implemented in Next.js with TanStack Query for data fetching and state, with end-to-end tests in Playwright.

KILOS — Youth Officials Management System

June 2025 - December 2025

Full-Stack Developer (backend-focused), Undergraduate Capstone

- Built a web platform to manage youth officials in Local Government Units using Next.js, Tailwind, Supabase, and Vercel.
- Drew adoption interest from a local LGU seeking a tailored deployment; co-authored the accompanying capstone paper.

EDUCATION

Bachelor of Science in Information Technology

August 2022 – May 2026

Ateneo de Naga University | QPI: 3.25 / 4.0

Member, Ateneo Consortium of Technological, Information, and Computing Sciences (TACTICS)

CERTIFICATIONS

- TOPCIT — Level 2 Proficiency (Test of Practical Competency in ICT)
- DataCamp (2026) — Introduction to Programming with Python (2.6 CPE credits)
- DataCamp (2026) — Understanding Cloud Computing (2 CPE credits)
- DataCamp (2026) — Understanding Prompt Engineering (2 CPE credits)
